Complete Care[®]

Single System Performance
Total Staining and Odor Control

Say Goodbye
to unpleasant staining and foul odors.
Say Hello
to complete household water treatment.

That's the Complete Care advantage.

Hicksgas Complete Care Series[®] is truly total care for your home's water system. Designed for problem water, this series packs a multitude of features into just one unit.

An exclusive zeolite crystal media acts to remove hardness, iron and manganese while reducing unwanted odors. It also raises low pH levels that can be corrosive to plumbing fixtures and piping. A patented, chlorine generator gets rid of nuisance iron and sulfur bacteria in the system which can create foul odors and clog pipes.

- **Patented self-chlorinating technology** – removes iron and sulfur bacteria during regeneration
- **Unique media** – eliminates staining and odors
- **Advanced microprocessing** – smart diagnostics and “low salt” warning ensure top performance
- **Efficient operation** – provides the benefits of a softener and filter with just one unit
- **Proven savings** – reduces operating and maintenance cost of all household water-using appliances

Complete Care[®]

Single System Performance Total Staining and Odor Control

Complete Care is one of the most unique and advanced systems within our extensive line-up of proven solutions.

Complete Care conditioners are unlike any other. Three innovative features give every Complete Care system a clear advantage in treating your water. An exclusive filtering media, a patented chlorine generator and a proprietary microprocessor control combine to provide outstanding performance in a remarkably effective single system.

Your Hicksgas professional will conduct a simple water test to identify the best Complete Care model for your needs. Once installed, just add salt and the system does the rest. That's "complete care" for your household water and plumbing.

Shown with optional neoprene sleeve - machine washable. Absorbs moisture and reduces condensation.

Why Complete Care?

With its patented self-chlorinating technology, the conditioner treats water better than any other single-tank system.

- Self-chlorinating system – disinfects the media bed
- Exclusive media – removes hardness, iron and manganese, while also raising low pH
- Low salt alarm – warns when salt is needed
- Records operating history – easy to ensure efficient operation and service
- Combination filter and softener in one unit – provides proven savings

Why Hicksgas?

Since 1962 Hicksgas water conditioning professionals have offered only the best in water treatment equipment. In addition to over 60 years experience, other Hicksgas advantages include:

- Third generation family operated
- Locally managed
- Factory-trained personnel
- A complete line of leading-edge water treatment solutions
