

# Simply Clear RC<sup>®</sup>

**Hardness and Chlorine Removal  
Wrapped into One System**

Whether your municipal water is hard, chlorinated, or both, Hicksgas Simply Clear RC Series<sup>®</sup> water conditioners will transform it to the clear, soft, odor-free water you want and need.

Environmentally-friendly tank design eliminates the need for two systems by combining two medias in one tank:

**Activated carbon** removes chlorine and unwanted tastes and odors; and,  
**High capacity resin** for maximum softening.

Hicksgas Simply Clear RC Series<sup>®</sup> features include:

- **Special "mid-plate" design** – eliminates the need for two tanks
- **Proven savings** – ensures minimal operating costs of all other household water-using appliances
- **Advanced monitoring** – tracks and self-adjusts to water usage patterns or changes
  - **Programmable operation** – matches system performance to your water conditions and needs
  - **Single tank design** – causes less pressure drops
  - **Efficient to operate** – uses less water and energy, less wear on clothing and appliances

Built in  
the U.S.A. 

# Simply Clear RC<sup>®</sup>

## Hardness and Chlorine Removal From One System!

The **Simply Clear RC Series<sup>®</sup>** of equipment is the newest, most advanced system in the extensive line-up of proven, Hicksgas water conditioning solutions.

Day and night, your Simply Clear RC water conditioner will provide the quality water you need for everyday life. Your water will create richer lathers - using less soap; it will rinse cleaner - without film and

residue; and your Simply Clear RC water conditioner will protect household plumbing and water-using appliances against scale and mineral build-up, while removing unpleasant taste and odors.

Best of all, this system is more efficient to operate than two units – saving you time, money and energy.

Shown with optional neoprene sleeve - machine washable. Absorbs moisture and reduces condensation.

### CARBON

- Eliminates chlorine and associated odors
- Improves taste

### SPECIAL MID-PLATE DESIGN

### RESIN

- Eliminates hardness
- Stops energy drain in water heater

## Why Simply Clear?

With its state-of-the-art microprocessor, this control system practically thinks for itself.

- Self adjusting regeneration sequence – saves salt and water
- Fully programmable operation to your household's needs – saves salt and water
- Records operating history – easy to ensure efficient operation and service
- Power backup – no clock to set

## Why Hicksgas?

Since 1962 Hicksgas water conditioning professionals have offered only the best in water treatment equipment. In addition to over 60 years experience, other Hicksgas advantages include:

- Third generation family operated
- Locally managed
- Factory-trained personnel
