Simply Clear® RC Series Water Softeners

WITH ADVANCED WATER TECHNOLOGY

Simply Clear® RC Series Water Softeners feature Advanced Water Technology that tracks water usage patterns and keeps the system running at peak performance. All while saving water and salt over traditional water softeners.

Proportional Regeneration alters the cycle times of backwash and rinse proportionally, saving you even more money over competing brands.

Savings History Screen records the amount of salt and water used during regeneration and compares data to a standard high efficiency system to show how much is being saved.

Optional Salt Monitor tests the brine solution in real time and alerts when more salt is needed.

SOFT HICKSGAS WATER®

Why Hicksgas Water Solutions?

Better Equipment.
Better Treatment.
Better Water.

Water touches our lives in myriad ways. Your family depends on water every day for laundry, dishes, bathing, cleaning, cooking and drinking. Just as every family is different, every household has specific water treatment needs.

No matter what your water problem, you'll find the solution with **Hicksgas Water Conditioning**. Over 50 years of experience and research goes into providing your household with the quality water you deserve, and we are proud that our equipment is made in the USA.

With a Hicksgas water solution, you'll realize benefits that will add up to *money-savings* for you and your family:

- appliances and fixtures perform better and more efficiently,
- conditioned water requires less detergent, shampoo and cleaners,
- your skin will feel smooth and soft,
- your hair will be more manageable,
- laundry will be bright and fresh-smelling, and
- your water-using appliances, plumbing and fixtures will last longer.

Whether your municipal water is hard, chlorinated, or both, the **Simply Clear® RC Series** is your answer for the clear, soft, odor-free water you want and need.

The environmentally-friendly tank design eliminates the need for two systems by combining two medias in one tank:
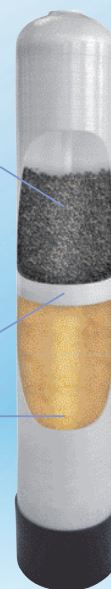

CARBON
- Eliminates chlorine and associated odors
- Improves taste

SPECIAL MID-PLATE DESIGN

RESIN
- Eliminates hardness
- Stops energy drain in water heater

Simply Clear® RC Series softeners feature a highly advanced control system with amazing operating efficiencies. By tracking your water usage and automatically adjusting itself, this system operates at maximum efficiency. You will save time, money and energy over operating two units, plus the RC unit provides proven savings by ensuring minimal operating costs and longer life-span of all of your water-using appliances.

Shown with optional neoprene sleeve – Machine washable, absorbs moisture and reduces condensation.
